

INITIAL STATEMENT OF REASONS
Description of Vehicle Required for Sale or Transfer
Section 150.06

Vehicle Code Section 5900 specifies information the owner of a vehicle must transmit to the department when a vehicle is sold or transferred to another person, but does not define what constitutes a description of the vehicle. This proposed regulatory action would adopt new Section 150.06 in Title 13, which is necessary to make clear to the public that the description of the vehicle consists of either the California license plate number or the vehicle identification number or both numbers. This information will ensure that the department has the necessary data to match the information regarding the vehicle transfer to the appropriate vehicle record.
